COVID-19 – Household Members - Current Recommendations

Dear Parents/Carers,

Per the current Director of Public Health recommendation, and because the infection risk of household contacts is 10 times higher than other contacts, we strongly recommend that if one individual in a household tests positive, any children and young people in that household who attend school or college should:

- Take a PCR test (ideally on Day 3-5 after first exposure), **and**
- Take a daily LFD test for 10 consecutive days from the date of first exposure
- Continue to attend school provided that their test results (PCR and LFD) are negative
- Self-isolate for 10 full days from the date of the test if any of their test results are positive
- In the event of a positive LFD test result, obtain a confirmatory PCR test

Note that anyone who has had a positive PCR test result within the previous 90 days should not be re-tested (PCR or LFD) unless they develop any new symptoms of COVID-19

Yours sincerely

Lucy Lee
